

## **Suggestions for lockdown 4.0**

Respect sir,

I have some suggestions related to lockdown 4.0.

I think we should give relaxation in zones except Red Zones .

1. All the public parks, restaurant, malls, and other places of gathering should be remain closed in all the zones
2. Red zones should be sealed and their essential needs should be delivered through Drones.
3. While in other zones everything essential daily needs goods should be provided through home

deliveries. To solve the problem of large number of delivery boys required , We can engage our youth for this . There are large number of young people who wants to help in this situation.

4. Not only for home deliveries , we can also use our youth to help us in maintaining rules, they can also help in hospitals and etc.
5. Instead of sending laborers back to their state. We should provide shelter to them. We can convert our government schools in shelter house for them. Where we can easily provide them food.
6. It important to stop laborers from going back to their state as when

lockdown will open. They will come back for work and the chances of community spread will arise

7. Inter state Borders should open as malls and other places of entertainment and gathering will remain closed . People with important work will come only .
8. Metro service should be open with proper guidelines. Such as passenger should leave 2 seats between them , only 4 passengers are allowed to stand in one coach. We can give duties to our youth to control these guidelines in metro.

9. Industries should be allowed to start their work with proper guidelines for social distance and sanitization.

Note: it's right time to allow our youth to help in this time. We can give them duties in shifts of 4-6 hours .
